**Configurational Comparative Methods: Qualitative Comparative Analysis (QCA) and Related Techniques (Applied Social Research Methods)** By Benoît Rihoux, Charles C. Ragin

**Configurational Comparative Methods** paves the way for an innovative approach to empirical scientific work through a strategy that integrates key strengths of both qualitative (case-oriented) and quantitative (variable-oriented) approaches. This first-of-its-kind text is ideally suited for "small-N" or "intermediate-N" research situations, which both mainstream qualitative and quantitative methods find difficult to address. Benoît Rihoux and Charles C. Ragin, along with their contributing authors, offer both a basic, comparative research design overview and a technical and hands-on review of Crisp-Set QCA (csQCA), Multi-Value QCA (mvQCA), and Fuzzy-Set QCA (fsQCA).

## Key Features

- Discusses existing applications in many different fields and disciplines along with state-of-the-art coverage of the strengths and limitations of these techniques
- Demonstrates further inventive ways of using QCA techniques
- Provides advice on how to develop a comparative research design (case and variable selection) as well as a specific technique called MSDO/MDSO (most similar, different outcome/most different, same outcome).
- Shows how to perform the technical operations linked to three specific QCA techniques: csQCA, mvQCA, and fsQCA
- Includes a glossary, an extensive bibliography, and a detailed list of good practices at every stage of the research process

## Intended Audience

A must for any student or researcher who wants to engage in systematic cross-case comparison in the social and behavioral sciences, the book is ideal for use in

upper-level undergraduate and graduate-level social science research methods courses.

### Editorial Review

#### Review

"This is a readable and useful book . . . an extended essay on one particular method, which is easy to understand, easy to apply, and generally useful. The method itself is implemented in a computer technique. . . This method will systematize the analysis and produce an elegant statement of the combination of conditions which lead to a divided working class--provided there are no contradictions in the data. Where there are contradictions, Ragin's method will identify these combinations of conditions that lead to an ambiguous result."--William Miller, "Study of Public Policy

#### From the Inside Flap

"This splendidly original work . . . will become an epistemological landmark appreciated by many different schools of thought that have wrestled with the methodological problems Ragin raises and answers."--Daniel Chirot, University of Washington

"Charles Ragin has produced a well-argued and highly provocative contribution to the growing literature on methods of comparative and historical sociology. While not everyone will agree, all will learn from this book. The result will be to intensify the dialogue between theory and evidence in comparative research, furthering a fruitful symbiosis of 'quantitative' and 'qualitative' methods."--Theda Skocpol, Harvard University
