

Cooperative and Cognitive Satellite Systems

By Symeon Chatzinotas, Bjorn Ottersten, Riccardo De Gaudenzi

Cooperative and Cognitive Satellite Systems By Symeon Chatzinotas, Bjorn Ottersten, Riccardo De Gaudenzi

Cooperative and Cognitive Satellite Systems provides a solid overview of the current research in the field of cooperative and cognitive satellite systems, helping users understand how to incorporate state-of-the-art communication techniques in innovative satellite network architectures to enable the next generation of satellite systems.

The book is edited and written by top researchers and practitioners in the field, providing a comprehensive explanation of current research that allows users to discover future technologies and their applications, integrate satellite and terrestrial systems and services to create innovative network architectures, understand the requirements and possibilities for future satellite communications standards and protocols, and evaluate the feasibility and practical constraints involved in the deployment process.

- Provides a solid overview of the current research in the field of co-operative and cognitive satellite systems
- Presents concepts in multibeam and multicarrier joint processing and high performance random access schemes
- Explains hybrid and dual satellite systems, cognitive broadband satellite systems, spectrum exploitation, and resource allocation

Editorial Review

From the Back Cover

Providing a solid overview of the current research in the field of Co-operative and Cognitive Satellite Systems, this book shows how to incorporate state-of-the-art communication techniques in innovative satellite network architectures, enabling the next generation of satellite systems. The book is edited and written by top researchers and practitioners in the field.

Coverage includes:

Evaluate the feasibility and practical constraints involved in the deployment process

About the Author
Symeon Chatzinotas is a Research Scientist at the Interdisciplinary Centre for Security, Reliability and Trust, University of Luxembourg. He has worked on numerous R&D projects and has authored more than 120 technical papers in refereed international journals, conferences and scientific books. He has served as Technical Program Committee member in numerous conferences and he is a Senior IEEE member. His research interests are in multiuser information theory, cooperative/ cognitive communications, and wireless network optimization.

Björn Ottersten is Director for the Interdisciplinary Centre for Security, Reliability and Trust at the University of Luxembourg. As Digital Champion of Luxembourg, he acts as an adviser to the European Commissioner. He has held high level research and teaching positions at various universities, and was Director of Research at ArrayComm Inc, a start-up in San Jose, CA, based on his own patented technology. He has authored over 450 scientific papers, including many award-winning journal and conference papers. He is currently editor in chief of EURASIP Signal Processing Journal. Dr. Ottersten is a Fellow of the IEEE and EURASIP. In 2011 he received the IEEE Signal Processing Society Technical Achievement Award. His research interests include security and trust, reliable wireless communications, and statistical signal processing.

Riccardo de Gaudenzi is Head of the Radio Frequency Systems, Payload and Technology Division at the European Space Agency Research and Technology Centre (ESTEC), Noordwijk, The Netherlands. The division is responsible for supporting the definition and development of advanced satellite system, subsystems and related technologies for telecommunications, navigation and earth observation applications. He has been responsible for a large number of R&D activities for TT&C, Telecom and Navigation applications. He spent one year with Qualcomm Inc., San Diego USA, in the Globalstar project system group. His current interest is mainly related with efficient digital modulation and multiple access techniques for fixed and mobile satellite services, synchronization topics, adaptive interference mitigation techniques and communication systems simulation techniques. He actively contributed to the development and the demonstration of the ETSI S-UMTS Family A, S-MIM, DVB-S2, DVB-S2X, DVB-RCS2 and DVB-SH standards. He has published more than 140 scientific papers and own more than 20 patents. Users

Review**From reader reviews:**

Linda Poteat: The particular book Cooperative and Cognitive Satellite Systems will bring someone to the new experience of reading any book. The author style to describe the idea is very unique. If you try to find new book you just read, this book very ideal to you. The book Cooperative and Cognitive Satellite Systems is much recommended to you to read. You can also get the e-book from the official web site, so you can

quicker to read the book.

Joe Stearns: A lot of people always spent their own free time to vacation or go to the outside with their loved ones or their friend. Did you know? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity this is look different you can read any book. It is really fun for yourself. If you enjoy the book that you just read you can spent all day every day to reading a book. The book Cooperative and Cognitive Satellite Systems it is rather good to read. There are a lot of individuals who recommended this book. These people were enjoying reading this book. In case you did not have enough space to develop this book you can buy often the e-book. You can more easily to read this book from your smart phone. The price is not too expensive but this book possesses high quality.

Jeffrey Dominguez: Beside this particular Cooperative and Cognitive Satellite Systems in your phone, it might give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh in the oven so don't be worry if you feel like an outdated people live in narrow town. It is good thing to have Cooperative and Cognitive Satellite Systems because this book offers to you readable information. Do you often have book but you rarely get what it's all about. Oh come on, that won't happen if you have this in the hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss the idea? Find this book along with read it from right now!

Thomas Baier: Don't be worry in case you are afraid that this book will probably filled the space in your house, you could have it in e-book technique, more simple and reachable. This Cooperative and Cognitive Satellite Systems can give you a lot of friends because by you looking at this one book you have thing that they don't and make a person more like an interesting person. This book can be one of one step for you to get success. This publication offer you information that probably your friend doesn't learn, by knowing more than different make you to be great individuals. So , why hesitate? Let's have Cooperative and Cognitive Satellite Systems.
