

Human Molecular Genetics, Fourth Edition

By Tom Strachan, Andrew Read

Human Molecular Genetics, Fourth Edition By Tom Strachan, Andrew Read

Human Molecular Genetics is an established and class-proven textbook for upper-level undergraduates and graduate students which provides an authoritative and integrated approach to the molecular aspects of human genetics. While maintaining the hallmark features of previous editions, the Fourth Edition has been completely updated. It includes new Key Concepts at the beginning of each chapter and annotated further reading at the conclusion of each chapter, to help readers navigate the wealth of information in this subject.

The text has been restructured so genomic technologies are integrated throughout, and next generation sequencing is included. Genetic testing, screening, approaches to therapy, personalized medicine, and disease models have been brought together in one section. Coverage of cell biology including stem cells and cell therapy, studying gene function and structure, comparative genomics, model organisms, noncoding RNAs and their functions, and epigenetics have all been expanded.

Editorial Review

Review

Praise for the Third Edition:

"This book is an excellent companion for students in human genetics or for researchers that want to gain background and knowledge in this field." *Human Genetics Journal*

"[*Human Genetics*] is a well-crafted piece that will entertain and educate interested readers....Lewis uses vibrant language and insightful allegories to explain difficult scientific concepts....It is certainly an up-to-date account of this quickly evolving field." *Quarterly Review of Biology*

About the Author

Tom Strachan is Scientific Director of the Institute of Human Genetics and Professor of Human Molecular Genetics at Newcastle University, UK, and is a Fellow of the Academy of Medical Sciences and a Fellow of the Royal Society of Edinburgh. Tom's early research interests were in multigene family evolution and interlocus sequence exchange, notably in the HLA and 21-hydroxylase gene clusters. While pursuing the latter, he became interested in medical genetics and disorders of development. His most recent research has focused on developmental control of the vertebrate cohesion regulators Nipbl and Mau-2.

Andrew Read is Emeritus Professor of Human Genetics at the University of Manchester, UK and a Fellow of the Academy of Medical Sciences. Andrew has been particularly concerned with making the benefits of DNA technology available to people with genetic problems. He established one of the first DNA diagnostic laboratories in the UK over 20 years ago (it is now one of two National Genetics Reference Laboratories), and was founder chairman of the British Society for Human Genetics, the main professional body in this area. His own research is on the molecular pathology of various hereditary syndromes, especially hereditary hearing loss.

Drs. Strachan and Read were recipients of the European Society of Human Genetics Education Award.

Users Review

From reader reviews:

Harley Fabry:

Now a day those who Living in the era wherever everything reachable by interact with the internet and the resources inside can be true or not demand people to be aware of each info they get. How people have to be smart in obtaining any information nowadays? Of course the solution is reading a book. Studying a book can help men and women out of this uncertainty Information specially this Human Molecular Genetics, Fourth Edition book since this book offers you rich info and knowledge. Of course the information in this book

hundred % guarantees there is no doubt in it everybody knows.

Steven Slaughter:

The guide untitled Human Molecular Genetics, Fourth Edition is the e-book that recommended to you to see. You can see the quality of the guide content that will be shown to you actually. The language that writer use to explained their ideas are easily to understand. The article writer was did a lot of exploration when write the book, so the information that they share to you is absolutely accurate. You also can get the e-book of Human Molecular Genetics, Fourth Edition from the publisher to make you a lot more enjoy free time.

Craig Nazario:

The book with title Human Molecular Genetics, Fourth Edition possesses a lot of information that you can understand it. You can get a lot of advantage after read this book. This book exist new information the information that exist in this reserve represented the condition of the world today. That is important to yo7u to be aware of how the improvement of the world. This book will bring you in new era of the glowbal growth. You can read the e-book on the smart phone, so you can read that anywhere you want.

Laura Hill:

Do you like reading a book? Confuse to looking for your favorite book? Or your book has been rare? Why so many concern for the book? But almost any people feel that they enjoy to get reading. Some people likes reading through, not only science book but additionally novel and Human Molecular Genetics, Fourth Edition or others sources were given know-how for you. After you know how the truly great a book, you feel desire to read more and more. Science publication was created for teacher or even students especially. Those textbooks are helping them to bring their knowledge. In additional case, beside science guide, any other book likes Human Molecular Genetics, Fourth Edition to make your spare time a lot more colorful. Many types of book like this.
