

Nanocomposite Membrane Technology: Fundamentals and Applications

By P.K. Tewari

Nanocomposite Membrane Technology: Fundamentals and Applications By P.K. Tewari

Nanocomposite Membrane Technology: Fundamentals and Applications is the first book to deliver an extensive exploration of nanocomposite membrane technology. This groundbreaking text offers an eloquent introduction to the field as well as a comprehensive overview of fundamental aspects and application areas. Approaching the subject from the materials point of view, this book:

- Discusses the history, synthesis, and characterization of nanocomposite membranes
- Examines water treatment, gas separation, and biomedical applications
- Addresses health, environmental, safety, and societal implications
- Considers processing challenges, including scalability issues
- Provides case studies of real-world implementations

Nanocomposite Membrane Technology: Fundamentals and Applications covers each topic with enough clarity and detail to be a valuable source of information for beginners and experts alike. Thus, this book is the guide of choice for scientists and engineers in both industry and academia.

Editorial Review

About the Author

P.K. Tewari joined the Bhabha Atomic Research Centre (BARC) in 1977 and became associate director of its Chemical Engineering Group in 2014. Currently, he is Raja Ramanna fellow in the BARC, consultant to the Office of the Principal Scientific Adviser to the Government of India, and professor at the Homi Bhabha National Institute. Dr. Tewari received his PhD in chemical engineering from the Indian Institute of Technology Bombay in 1987. He was chairman of the International Nuclear Desalination Advisory Group of the International Atomic Energy Agency (IAEA) from 2005 to 2008 and is currently chairman of the Technical Working Group on Nuclear Desalination of the IAEA. Widely published and highly decorated, Dr. Tewari is chairman of the Water Quality for Industrial Purposes Committee of the Bureau of Indian Standards, president of the Indian Desalination Association, member of the Board of Directors of the International Desalination Association, editor-in-chief of the *International Journal of Nuclear Hydrogen Production and Applications*, associate editor of the *International Journal of Nuclear Desalination*, and member of the editorial board of *Desalination and Water Treatment*.

Users Review

From reader reviews:

Richard McCain:

As people who live in the modest era should be revise about what going on or info even knowledge to make them keep up with the era that is always change and move ahead. Some of you maybe can update themselves by studying books. It is a good choice for yourself but the problems coming to an individual is you don't know what one you should start with. This Nanocomposite Membrane Technology: Fundamentals and Applications is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

Trina Durham:

Now a day individuals who Living in the era everywhere everything reachable by talk with the internet and the resources in it can be true or not involve people to be aware of each details they get. How people have to be smart in acquiring any information nowadays? Of course the solution is reading a book. Studying a book can help folks out of this uncertainty Information especially this Nanocomposite Membrane Technology: Fundamentals and Applications book because this book offers you rich details and knowledge. Of course the info in this book hundred pct guarantees there is no doubt in it everbody knows.

Chester Brown:

This book untitled Nanocomposite Membrane Technology: Fundamentals and Applications to be one of

several books which best seller in this year, that's because when you read this publication you can get a lot of benefit into it. You will easily to buy this book in the book shop or you can order it through online. The publisher of the book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Cell phone. So there is no reason for you to past this publication from your list.

Jennifer Valdovinos:

Don't be worry when you are afraid that this book will probably filled the space in your house, you can have it in e-book technique, more simple and reachable. That Nanocomposite Membrane Technology: Fundamentals and Applications can give you a lot of good friends because by you considering this one book you have point that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This e-book offer you information that might be your friend doesn't learn, by knowing more than various other make you to be great individuals. So , why hesitate? We need to have Nanocomposite Membrane Technology: Fundamentals and Applications.
