

The Way of Men

By Jack Donovan

The Way of Men By Jack Donovan

What is masculinity? Ask ten men and you'll get ten vague, conflicting answers. Unlike any book of its kind, *The Way of Men* offers a simple, straightforward answer-without getting bogged down in religion, morality, or politics. It's a guide for understanding who men have been and the challenges men face today. *The Way of Men* captures the silent, stifling rage of men everywhere who find themselves at odds with the over-regulated, over-civilized, politically correct modern world. If you've ever closed your eyes and wished for one day as a lion, this book is for you.

Editorial Review

Review

"Jack Donovan has written a thought-provoking treatise on the essential struggle of men, taking on timeless concepts, in an honest examination of what manhood means to him. [...] while I didn't always agree with everything he said--I am a better man for reading it." - Sam Sheridan, *A Fighter's Heart, A Fighter's Mind*

"A thought provoking read on what it means to be a man today in a world that's increasingly finding masculinity undesirable and un-needed. Donovan makes bold and unapologetic arguments on what The Way of Men needs to be in the future." - Brett McKay, *The Art of Manliness, Manvotionals*

"Absolutely love this book! I found Jack's comments on the underlying primal instincts that motivate men and what can generate unity within a group to be both thought provoking and spot on from a leadership perspective." - Chris Duffin, AAPF and APA record-holding competitive powerlifter, coach, and gym owner.

"Peering behind the layers of civility we indulge in as a matter of pretense, Donovan explores the primal relationship between tribal identity and masculinity, and emerges endorsing a type of Nietzschean struggle for significance through conflict" - Brett Stevens, *Amerika.org*

"This book should be required reading for all American men, containing brilliant insights I had not previously considered. It clearly shows how your masculinity is being muzzled in order to achieve an experimental result that doesn't serve your interests. Highly recommended." - Roosh V, author of 30 Bangs, etc.
