### Editorial Review

From School Library Journal

Kindergarten-Grade 3 Beautiful, detailed illustrations are the highlight of this simple introduction. Each spread includes one line of large-print text opposite a full-page picture of an animal. Characteristics of many different, primarily Australian, marsupials are described in language young students will understand. However, by highlighting characteristics that are so general, children might be unclear about what constitutes a marsupial. (They may live in trees...on the ground...or underground. Many marsupials are nocturnal they hunt and eat at night. Others look for food during the day.) An afterword does provide additional information about the number of species, location, and the nourishment of a newborn, along with clear details about the animals shown in each illustration. Report writers are likely to find the most useful information in this section. *Christine Markley, Washington Elementary School, Barto, PA*

K-Gr. 2. The Sills offer the tenth book in their series of guides to the animal kingdom, which began with *About Birds* (1991). Written with simplicity and dignity, this well-illustrated book identifies the characteristics and behaviors of marsupials in the wild and concludes with the importance of protecting these animals and their habitats. A typical double-page spread includes a line or a phrase of text on the left-hand page, facing a handsome, full-page painting of an animal in the wild. Well-suited to classroom sharing, the paintings are attractively composed and clearly delineated. In a six-page afterword, each plate is reproduced in miniature, and the basic facts expressed in the main text are supported with paragraphs of added information. The book concludes with a brief glossary and lists of recommended books, videos, and Web sites. Primary-grade teachers will especially appreciate the book's succinct text and fine illustrations. *Carolyn Phelan*
