

The Feynman Imperative: Why Science Works

By David Christopher Lane

The Feynman Imperative: Why Science Works By David Christopher Lane

This book consists of six distinct essays describing how science works, with special attention to how Richard Feynman viewed the scientific method. Chapter one explores the difference between evolution and mysticism's version of intelligent design. Chapter two is entitled The Feynman Imperative and explores a contentious debate over reductionism and its role in the hard sciences, particularly in explaining consciousness. Chapter three details how practical the scientific endeavor is and why science tends to avoid making dogmatic and absolute statements. Other chapters include: The Gravity of Science, Feynman's Flower (and the beauty of physics and biology), and concludes with Shiva Science which illustrates that science is composed of many avenues and not just one. Dr. Lane has taught science and religion courses at California State University, Long Beach for over a decade and is currently a Professor of Philosophy at Mt. San Antonio College where he lectures on quantum theory, neuroscience, and evolutionary biology. He has also produced a number of original mini films dealing with Richard Feynman's philosophy of science.

Editorial Review

About the Author

David Christopher Lane is a Professor of Philosophy at Mt. San Antonio College. Professor Lane received his Ph.D. from the University of California, San Diego, where he was also a recipient of a Regents Fellowship. He has two M.A.'s (one in Sociology from UCSD; and one in the History and Phenomenology of Religion from GTU, Berkeley). Dr. Lane has previously taught at the University of London, California School of Professional Psychology, and Warren College at the University of California, San Diego. He has written a number of books, including *The Radhasoami Tradition* (Garland Publishers, New York, 1992) and *Exposing Cults: When the Skeptical Mind Confronts the Mystical* (Garland Publishers, New York, 1994). He was instrumental in releasing the life and work of Baba Faqir Chand, which is published under the title *The Unknowing Sage* (MSAC Philosophy Group, Walnut, Fifth edition, 2014). Dr. Lane is married to Andrea Diem-Lane, who is also a Professor of Philosophy at Mt. San Antonio College. They have two children, Shaun-Michael and Kelly-Joseph. Professor Lane's is currently working on a series of films detailing his research work in India and elsewhere. Lane has also produced a number of original films on quantum theory, evolutionary biology, and probability theory.

Users Review

From reader reviews:

Nelson Wyatt:

This *The Feynman Imperative: Why Science Works* are usually reliable for you who want to be considered a successful person, why. The key reason why of this *The Feynman Imperative: Why Science Works* can be one of the great books you must have will be giving you more than just simple looking at food but feed anyone with information that might be will shock your prior knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed people. Beside that this *The Feynman Imperative: Why Science Works* forcing you to have an enormous of experience such as rich vocabulary, giving you demo of critical thinking that could it useful in your day exercise. So , let's have it appreciate reading.

Barbara Bell:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their sparetime with their family, or their own friends. Usually they doing activity like watching television, likely to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? Could possibly be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to try out look for book, may be the reserve untitled *The Feynman Imperative: Why Science Works* can be good book to read. May be it can be best activity to you.

Robert Schrader:

People live in this new morning of lifestyle always try and and must have the spare time or they will get great deal of stress from both way of life and work. So , whenever we ask do people have time, we will say absolutely without a doubt. People is human not really a robot. Then we question again, what kind of activity have you got when the spare time coming to a person of course your answer will probably unlimited right. Then do you ever try this one, reading publications. It can be your alternative inside spending your spare time, typically the book you have read is actually The Feynman Imperative: Why Science Works.

William Johnson:

Many people spending their time by playing outside with friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by reading a book. Ugh, do you consider reading a book can really hard because you have to use the book everywhere? It all right you can have the e-book, having everywhere you want in your Touch screen phone. Like The Feynman Imperative: Why Science Works which is obtaining the e-book version. So , try out this book? Let's view.
