

## The Flat World and Education: How America's Commitment to Equity Will Determine Our Future (Multicultural Education)

By Linda Darling-Hammond

**The Flat World and Education: How America's Commitment to Equity Will Determine Our Future (Multicultural Education)** By Linda Darling-Hammond

*The Flat World and Education* offers an eye-opening wake-up call concerning America's future and vividly illustrates what the United States needs to do to build a system of high-achieving and equitable schools that ensures every child the right to learn.

"We are so fortunate that Linda Darling-Hammond has provided this road map for educational excellence for all children in today's flat world. She thoughtfully emphasizes the basic strengths that we need in these changing times and then outlines what our schools must do to respond to 21st-century learning needs. Linda is one of the education researchers whom I most respect. 'All children' must mean all children and this book shows us how to do it."

**-Richard W. Riley**, Former U. S. Secretary of Education

"When Linda Darling-Hammond speaks, America's teachers listen! I listened and learned from her as we together led the National Board for Professional Teaching Standards and created the National Commission on Teaching and America's Future. Excellent schools are the key to America's economic future, and superb teaching is the key to great schools. This book makes clear as a bell how to organize schools for successful teaching and what state and national policies are required to support it."

-James B. Hunt, Former Governor of North Carolina and President of the Hunt Institute

"Her arguments are sound, rooted in evidence, and unencumbered by the kinds of

ideological partisanship that characterizes too much of current educational debates. After reading this book, one will understand why it was that Barack Obama, when seeking advice from the sharpest minds in education, turned to Dr. Linda Darling Hammond."

**-Pedro A. Noguera**, Metropolitan Center for Urban Education, New York University

"Once again Darling-Hammond brings clarity to complexity, thoughtful analysis to politically charged issues, and sound policy recommendations to the hysteria of what to do to save America's public schools. In this volume the macro meets the micro on terms that lets all democratically-minded citizens breathe a sigh of relief."

**-Gloria Ladson-Billings**, University of Wisconsin Madison

"Anyone who desires a quantum leap in the educational achievements of American students-as opposed to the 'quick fix'-must address the issues raised in this carefully argued and well documented work."

**-Howard Gardner**, Harvard Graduate School of Education

"Linda Darling-Hammond has written the definitive description of the problems that drag down the quality and equity of our educational system. Writing with passion, solid scholarship, and compassion, she presents a vision of the changes that are necessary to build a better education system and a brighter future for all our children and our nation."

**-Diane Ravitch**, New York University

"Linda Darling-Hammond's latest is a profoundly important book. She provides both a powerful rationale and a clear, detailed roadmap for how public education must be transformed to meet the challenges of teaching, learning, and assessment in the 21st century. It is a must-read for educators, policymakers, and others concerned about the future of our country in a 'flat' world."

**-Tony Wagner**, co-director, Harvard Change Leadership Group

### Editorial Review

From Publishers Weekly

Starred Review. Examining in detail issues like equality of spending, testing in K-12 education, and teacher preparation, Stanford education professor Darling-Hammond (*The Right to Learn*) makes a clear, organized argument that, "like manufacturing industries that have struggled and gone under in recent decades, modern schools were designed at the turn of the last century," and are in desperate need of transformation. Using a straightforward style to examine complex issues, Darling-Hammond reveals the successful educational strategies around the world that are toppling the old educational guard, including a high degree of personalization that allows stronger, closer relationships among students, faculty, staff, and parents. Darling-Hammond doesn't shy away from difficult questions at the heart of seemingly-intractable academic issues; for example, "How is it that scores have been driven upward on the state tests required by No Child Left Behind, yet they have dropped on... international measures?" Scholarly and factual, well-researched and packed with astounding examples of the current climate of American education, this text should prove highly informative for educators, educational administrators, and involved parents throughout the U.S.

Review

Contains a valuable lode of practical and research-based advice about how to improve our schools. --  
Washington Post

There are few who are as strong as Darling-Hammond in using and analyzing statistical data and scholarship...and in fighting for educational equity; when she talks about leaving no child behind, she truly means it. This book is a must for graduate education students, educators, [and] policy makers...Essential. --  
CHOICE Magazine

Darling-Hammond identifies the policies and the practices that could turn the tide from educational mediocrity to educational excellence for all if we only had the will. --The School Administrator
