## Pseudo-Differential Equations And Stochastics Over Non-Archimedean Fields (Pure and Applied Mathematics) By Anatoly Kochubei

Provides comprehensive coverage of the most recent developments in the theory of non-Archimedean pseudo-differential equations and its application to stochastics and mathematical physics--offering current methods of construction for stochastic processes in the field of p-adic numbers and related structures. Develops a new theory for parabolic equations over non-Archimedean fields in relation to Markov processes.
