### Editorial Review

#### Review

"These volumes provide useful and detailed firsthand experience of tackling many of the problems which are frequently encountered in the employment of antibodies (both monoclonal and polyclonal) and lectins as immunocytochemical reagents at the light and electron microscopic level. I recommend this series of books as a valuable introduction for the novice immunocytochemist and, more particularly, as useful and often enlightening reading for the experienced immunocytochemist."

--JOURNAL OF CLINICAL PATHOLOGY

### Users Review

#### From reader reviews:

##### **Kathleen Elder:**

This Techniques in Immunocytochemistry: 004 book is simply not ordinary book, you have it then the world is in your hands.
