World Cruising Routes: 7th edition: 1000 Sailing Routes In All Oceans Of The World (World Cruising Series) By Jimmy Cornell

Since its publication in 1987, World Cruising Routes has become one of the best-selling nautical publications in the world. World Cruising Routes, and its companion volumes World Cruising Destinations, World Voyage Planner and Cornell's Ocean Atlas, are to be found on board every long distance cruising yacht, and provide ocean navigators all the information they need, from the planning stages of a voyage to its successful completion.

Since 1987, offshore navigation has undergone a number of major changes, and this new edition has been thoroughly revised to meet the requirements and expectations of the current generation of offshore sailors. The revisions were dictated primarily by the information contained in the latest pilot charts, which required a rethinking of some old established route planning tactics, many of which are no longer valid. Another important change made in this edition is the addition of detailed waypoints on some well-travelled routes, as well as the inclusion of alternative routes leading to popular cruising destinations. Compared to previous editions, where the waypoints were listed mainly for planning purposes, in this new edition every waypoint along each route is listed, enabling the navigator to plot a course for any passage from start to finish. One new feature added to this edition is that of windgrams depicting a summary of wind conditions for the month when passages are undertaken along some of the most commonly sailed routes.

In direct response to current navigational methods, most routes have been redesigned to provide essential passage planning details. New routes have been added to areas rarely explored until recently by cruising yachts, from Greenland and Micronesia to China and the Northwest Passage.

Described as the bible of cruising sailors, World Cruising Routes is the definitive reference book for long-distance navigators. This totally revised and updated edition has drawn on the latest weather information available to provide the most comprehensive aid to planning a safe voyage to any part of the world. With over 1000 sailing routes in all the oceans of the world, from the tropics to the high latitudes of the Arctic and Antarctic, it contains essential information on winds, currents, regional and seasonal weather as well as optimum times for individual passages.

Geared specifically to the needs of offshore navigators, this comprehensive guide

contains all the necessary information for planning a passage in any of the world's oceans. This seventh edition assesses the consequences of climate change on sailing routes and provides over 6,000 waypoints to assist skippers in planning individual passages. Much of the information contained in the following pages was gathered during the author's three circumnavigations. It is the perfect one-stop reference for planning a voyage anywhere in the world.

This is a companion volume to both World Voyage Planner, which offers invaluable planning strategies and advice on long-distance voyaging, as well as World Cruising Destinations, which gives practical information on all the maritime nations of the world with details of their main cruising attractions, climate, formalities, marinas, repair facilities, charter operators, cruising guides and websites.

Editorial Review

About the Author

An accomplished sailor, event organiser and successful author, Jimmy Cornell has sailed 200,000 miles in all oceans of the world including three circumnavigations as well as voyages to Antarctica, Alaska and Spitsbergen. Thousands of sailors have fulfilled their dream of blue water cruising with the help of Jimmy Cornell's books. Jimmy Cornell is the founder of the ARC transatlantic rally, World Cruising Club and noonsite.com. Since 1986 Jimmy Cornell has organized 20 transatlantic rallies, five round the world rallies and one round the world race, with over 3,000 yachts and 15,000 sailors having participated in his sailing events. His latest project is the Blue Planet Odyssey, a global event aimed at raising awareness of the effects of climate change, in which he will sail on his new yacht Aventura IV.

Users Review

From reader reviews:

Leslie Heidelberg:
