Effective Advertising: Understanding When, How, and Why Advertising Works (Marketing for a New Century) By Gerard J. Tellis

Understanding Effective Advertising: How, When, and Why Advertising Works reviews and summarizes an extensive body of research on advertising effectiveness. In particular, it summarizes what we know today on when, how, and why advertising works. The primary focus of the book is on the instantaneous and carryover effects of advertising on consumer choice, sales, and market share. In addition, the book reviews research on the rich variety of ad appeals, and suggests which appeals work, and when, how, and why they work.

The first comprehensive book on advertising effectiveness, **Understanding Effective Advertising** reviews over 50 years of research in the fields of advertising, marketing, consumer behavior, and psychology. It covers all aspects of advertising and its effect on sales, including sales elasticity, carryover effects, content effects, and effects of frequency. Author Gerard J. Tellis distills three decades of academic and professional experience into one volume that successfully dismisses many popular myths about advertising.

Editorial Review

Review

“Tellis has done a remarkable job. He has brought together an amazingly diverse literature. Unlike some other sources that claim to be able to measure the effects of advertising, Tellis's thoroughness and ability to understand and convey results of various experiments and statistical analyses helps the reader to separate the wheat from the chaff. Any student of advertising, whether new to the field or a seasoned veteran executive or researcher, should read this book.”

(Alan G. Sawyer)

"Tellis offers incredible insight into understanding when, how, and why advertising works - all in fewer than 200 pages! Drawing from an extensive review of the literature, Tellis synthesizes results into a highly readable set of conclusions, focusing on advertising's effects on behavior and sales / market share that result from initial and subsequent exposures."
