

Hyperspectral Image Processing

By Ligu Wang, Chunhui Zhao

Hyperspectral Image Processing By Ligu Wang, Chunhui Zhao

Based on the authors' research, this book introduces the main processing techniques in hyperspectral imaging. In this context, SVM-based classification, distance comparison-based endmember extraction, SVM-based spectral unmixing, spatial attraction model-based sub-pixel mapping and MAP/POCS-based super-resolution reconstruction are discussed in depth. Readers will gain a comprehensive understanding of these cutting-edge hyperspectral imaging techniques. Researchers and graduate students in fields such as remote sensing, surveying and mapping, geosciences and information systems will benefit from this valuable resource.

Editorial Review

From the Back Cover

Based on the authors' research, this book introduces the main processing techniques in hyperspectral imaging. In this context, SVM-based classification, distance comparison-based endmember extraction, SVM-based spectral unmixing, spatial attraction model-based sub-pixel mapping, and MAP/POCS-based super-resolution reconstruction are discussed in depth. Readers will gain a comprehensive understanding of these cutting-edge hyperspectral imaging techniques. Researchers and graduate students in fields such as remote sensing, surveying and mapping, geosciences and information systems will benefit from this valuable resource.

Users Review

From reader reviews:

Scott Frew:

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the Mall. How about open or even read a book eligible Hyperspectral Image Processing? Maybe it is being best activity for you. You recognize beside you can spend your time with your favorite's book, you can better than before. Do you agree with their opinion or you have some other opinion?

Elizabeth Frizzell:

In this 21st millennium, people become competitive in most way. By being competitive currently, people have do something to make all of them survives, being in the middle of often the crowded place and notice by surrounding. One thing that at times many people have underestimated the idea for a while is reading. Yep, by reading a guide your ability to survive enhance then having chance to stand than other is high. In your case who want to start reading any book, we give you that Hyperspectral Image Processing book as nice and daily reading book. Why, because this book is more than just a book.

Gene Baker:

As people who live in the particular modest era should be change about what going on or facts even knowledge to make all of them keep up with the era which is always change and make progress. Some of you maybe will probably update themselves by reading books. It is a good choice for you personally but the problems coming to you is you don't know which one you should start with. This Hyperspectral Image Processing is our recommendation to make you keep up with the world. Why, because book serves what you want and wish in this era.

Donna Bledsoe:

The actual book Hyperspectral Image Processing will bring one to the new experience of reading the book. The author style to describe the idea is very unique. In the event you try to find new book you just read, this book very suited to you. The book Hyperspectral Image Processing is much recommended to you to read. You can also get the e-book in the official web site, so you can quicker to read the book.
