From the Author

Let your passion, knowledge and skills create an excellent career opportunity. If you are serious about advancing in your field, get this book. Become influential, earn credibility and study for the ISP Certification.

Dear security professional. You already know your business. Chances are you've either been at it for many years, you've had a great mentor and you are familiar with NISPOM requirements. That's what we call secret number one, you are a technical expert and know the business of protecting classified information.

Since you are practically an expert anyway, let us help you prepare for the test and build your confidence. Our book helps you prepare for both your career and the ISP Certification Exam. Keep reading for sample questions.

My name is Jeff Bennett and I am board certified to protect classified information. My signature is Jeffrey W. Bennett, ISP and I display it proudly. I teach the Industrial Security Management Course at University Of Alabama Huntsville and am the author of the "go to" book *DoD Security Clearance and Contracts Guidebook*. After 25 years in the Army and industrial security business, you can say that "I've been there and done that".

The ISP Certification is based on the NISPOM. This book offers a few pages dedicated to helping security specialists advance in their careers. Such advice includes: become engaged in facility security self-inspections, understand what is in NISPOM (it's not important to memorize NISPOM, but understand how to find the information), form study groups, join NCMS and join the study program mentioned by the reviewer. I also offer advice for security specialists to advance in their career.

However, the primary purpose of our book is to provide practice exams. The workbook the reviewer mentions had 15 questions when I took it. This book has 220 and my other has 440. That is why the book is almost 100% questions, answers and references to where to find the answers in NISPOM. Though not endorsed by the NCMS, this book was authored by a board certified ISP and edited and reviewed ISPs. For more comments please see reviews for "ISP Certification-The Industrial Security Professional Exam Manual" (Not the pocket edition).

About the Author

Jeffrey W. Bennett is an ISP with certificate number 117. Jeff has worked for the Army and defense contractors for over 25 years developing and implementing programs to protect classified information. He developed this study manual to help motivate his peers in industry and offering them opportunity to take practice tests. His primary goal is to bring awareness to the program and increase the number of security specialists training for professional certification. You can join his industrial security newsletter by visiting his website.
